Technical Presentation : Javascript - 1

- Javascript Console
- DOM and its methods
- Scope
- Data types
- Conditions (Ternary, Switch etc etc)
- Loops (In Detail)
- Data Structures
    - Array
    - Object
    - Map
    - Set
    - Linked List
    - Tree
    - Stack
    - Queue
    - Graph
- Arrays (In Detail with methods) Single and Multidimensional
- Strings (In Detail with methods)
- Event Loop (Most important concept, make sure to understand in detail)
- Functions (all types , write own implementation and explanation : most important)
- Modules(Try to know)
- OOPS in JS
- ES6 (Very important)
    - arrow function
    - template literal
    - object and array destructuring,
    - default params,
    - rest and spread operators,
    - let and const,
    - modules(import and export)
- setInterval, clearInterval, setTimeout, clearTimeout (Implementations)
